Explanation

Words and figures inclosed in brackets [] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 60th Congress, 2d session, is to be understood.

NOTES OF GENERAL INTEREST

SERIAL NUMBERS

So many inquiries have reached this office relative to the omission of the serial numbers from the backs of those volumes of the Congressional series of documents and reports for the 60th Congress, 1st session, which have been delivered to the libraries in their new buckram binding, that some explanation needs to be made of the change in the issue of these Congressional publications, which made necessary this omission, brought about by the terms of Joint Resolution No. 3 of the 60th Congress, 1st session, approved January 15, 1908 (35 Stat. L., part 1, page 565), and initiated with the publications of the 60th Congress, 1st session.

The explanation is a simple one and should be acceptable to all. The provisions of the resolution relating to this subject are as follows:

* * * *Provided,* that of the "usual number," the copies which are intended for distribution to State and Territorial libraries and other designated depositories of all annual or serial publications originating in or prepared by an Executive Department, bureau, office, commission, or board shall not be numbered in the document or report series of either House of Congress, but shall be designated by title and bound as hereinafter provided. * * *

SEC. 2. That in the binding of Congressional documents and reports for distribution by the Superintendent of Documents to State and Territorial libraries and other designated depositories, every publication of sufficient size on any one subject shall hereafter be bound separately and receive the title suggested by the subject of the volume, and the others shall be distributed in unbound form as soon as printed.

There has always been a Congressional edition as well as a Departmental edition of the annuals and serials affected by the resolution, and the only change wrought is in the sending of these publications to the libraries in their Departmental rather than in their Congressional prints as heretofore.

The Congressional series, or what has been known as the "sheep set" has practically been abolished. There are to be a few sets, for the official use of Congress, the volumes of which will comprise the full series of numbered documents and reports, but even these volumes will not be bound in sheep skin; so that the proper term "Congressional Series" will have to be applied to these sets hereafter, as "sheep set" would have no significance. These complete sets can be grouped by serial numbers as heretofore, but the application of these symbols to the library issue in the future, while still possible, is not advised.

The library edition thus established will be uniform as to contents and binding with the limited complete Congressional edition, although the title pages of the annuals and serials will be without the document notation, and the back-titles will conform to those in the Departmental edition.

It will thus be seen that all the publications which contributed to the "sheep set" will still be received by the libraries, and that nothing will be sacrificed by the change, except a costly and inferior binding and long delays which were inevitable under the old method. The books will all be bound in a distinctive buckram instead of sheep skin, so that their identity as Congressional documents will still be maintained.

A schedule will be issued each year as soon as it is definitely known how many volumes there will be in the complete set for a session of Congress, and this schedule will give a description of each volume and its serial number in a complete Congressional set, and will indicate whether it is sent to the libraries in its Departmental or Congressional form.

These schedules can be used as checklists, and any librarian who so desires can place all the volumes on the shelves in the old way by serial numbers, thus preserving the method in vogue for so many years of keeping together all the publications printed by order of Congress, no matter how dissimilar. The purely Congressional volumes will necessarily be kept together, and the serial numbers can be applied as soon as this office is able to furnish them, but the annuals and serials, being distinctive, should be shelved in their respective department classes, and dummies inserted among the Congressional publications if identification with the Congressional series is desired.

The object of the change in issue brought about by the resolution was to enable this office to forward these useful documents immediately upon their publication, instead of holding them for from six to eighteen months for the purpose of binding in nondescript volumes of an arbitrarily numbered set. This prompt sending which the change assures has not been possible during the 60th Congress, owing to the lack of proper materials for binding, but in the future, when the back work has been caught up (and we anticipate this will be accomplished in two months), the delivery to the libraries will be simultaneous with that to the publishing offices.

It would not be possible to accomplish this immediate delivery and at the same time assign serial numbers to the volumes in advance. After careful consideration, it was decided to send the books out as issued and later furnish the serial numbers to be applied if desired, rather than hold the books for many months until the numbers could be assigned.

Any change in method of issue is no doubt repugnant to a busy librarian, but if carefully considered its advantages will be recognized. In a later issue of the Monthly catalogue will appear an article on "The passing of the sheep set," which will fully set forth the entire history of the evolution of the most wonderful series of all Government publications.

Col. Goethals, who is at the head of the canal-building forces on the Isthmus, has put in writing a vigorous defence of the lock plan and criticism of the sea-level plan. This has been printed in a handy pamphlet.

A very large and attractive volume is Professional paper 63 of the Geological Survey, devoted to description and illustration of the Georgetown quadrangle in the mining district of Colorado.

The annual report of the governor of Arizona carries with it a new map of the Territory.

The Copyright Office, Library of Congress, has issued the new copyright law as Bulletin 14. The law becomes effective July 1, 1909.

The Digest of decisions of the Treasury Department for the calendar year 1908 is out.

The little pamphlet from the Census Bureau entitled Instructions to special agents, census of fishing industry, 1908, contains matter of interest not only to special agents but to mere fish fanciers as well.

A special report on the machine tool trade in Germany, France, and other European countries comes from the Manufactures Bureau.

Hygienic Laboratory Bulletin 47, Studies on thyroid, will command the attention of a large medical public.

A new feature in document publication is the recent action of the International Bureau of the American Republics, this Bureau having reprinted for distribution on its own account 6 of the recent special reports of the Commerce and Labor Department and the Manufactures Bureau. The documents thus distinguished are Reports on trade conditions in Ecuador, Colombia, Cuba, and Mexico, these 4 being by Chas. M. Pepper, and Report on trade conditions in Brazil, and in Central America and on west coast of South America, these 2 by Lincoln Hutchinson.

Proceedings of the conference with representatives of labor in the office of the Secretary of Commerce and Labor, Feb. 10 and 11, 1909, are now published in a pamphlet of 133 pages.

Statistically-minded persons will be interested in the lively discussion found in a 43-page pamphlet entitled The Census Office and coordination of statistics, being the reply of the director of the census to the inquiries of the Interdepartmental Statistical Committee.

Mr. W. A. Graham Clark makes a special illustrated report of 144 pages, Manufacture of woolen, worsted, and shoddy in France and England, and jute in Scotland, to the Manufactures Bureau.

The Government entomologists have come to the conclusion that the extermination of the San Jose scale can no longer be considered possible. But they believe it can be controlled and kept in check by proper measures, and what these measures are they tell in Entomology Bureau Circular 42, of which a 5th edition is now published.

The Nevada mouse plague of 1907–8; Irrigation in Sacramento Valley, Cal.; Forest planting in western Kansas; Apple blotch, a serious disease of southern orchards; and Agricultural conditions in southern Texas are new agricultural titles each one of which will find an interested constituency.

A new edition of Navy regulations, imprinted 1909, is off the press.

The 1908 report of the Life-Saving Service necessarily carries many stories of hairbreadth escapes along with its more prosy statistical material.

Mortality statistics, 1907, 8th annual report, issued by the Census Bureau, relates only to those States or other civil divisions of the United States which provide by law for the registration of births and deaths. Though the registration area has more than doubled since the publication of these reports began, it still includes little more than half the population of the country.

That standard classic of the agricultural world, Special report on diseases of cattle, is out in a new edition, revised and brought up to date by the Animal Industry Bureau.

Mr. J. O. Manson, a chief of division in the Treasury Department, who was designated by the Secretary to accompany as a financial expert the National Monetary Commission to Europe last year, has now submitted to Senator Aldrich, the chairman of the Commission, a report on the fiscal systems of the United States, England, France, and Germany, and it has been printed in a pamphlet of 86 pages.

Mr. Henry Talbott of the Interstate Commerce Commission has compressed into a 45-page pamphlet a Table of cases cited in the opinions of the Interstate Commerce Commission during the whole term of its existence from Apr. 1887 to Jan. 1909, covering the contents of the 14 volumes of its reports.

A year's tests at the Government's Denver testing plant in the washing and coking of coal are reported in Bulletin 368 of the United States Geological Survey.

Water-supply paper 225, from the United States Geological Survey, Ground waters of the Indio region, California, includes also a sketch of the Colorado desert. It is a country of sand dunes, mud volcanoes, deserts, and sinks, including the Salton basin. The author, Walter C. Mendenhall, expresses the opinion that the description of the Desert written by Professor W. P. Blake for the Pacific Railroad survey of 1853 remains the best description yet published. It is an interesting district. To reduce it to orderly agricultural uses will be an achievement worth while.

The Army and Navy registers for 1909 are published.

The Proceedings of the conference on the care of dependent children, held in Washington, D. C., Jan. 25 and 26 last, has been published as Senate document 721.

Mr. Newell, chief of the Reclamation Service, has visited Hawaii for the purpose of inquiring into its attractions for home makers, and sets forth his plain unvarnished conclusions in Senate document 668.

Imports and duties, 1894–1907, described by the Democratic leader in the House of Representatives as the most illuminating book on the tariff question yet issued, has been reissued as House document 1504.

A rather rare volume, first issued in Albany in 1821, and carrying in the fashion of its day a very long title-page in which the chief title is Secret proceedings and debates of the Convention of 1787 by which the Constitution of the United States was formed, will not be so rare hereafter, having been reprinted as Senate document 728 of the 60th Congress, 2d session. The authors were Robert

Yates of New York and Luther Martin of Maryland, both members of the Convention and both unfriendly to the Constitution as adopted.

Notes on tariff revision, a very large book filled with data concerning tariff matters, has been reprinted as House document 1503.

All of the new Congressional document issues mentioned in this month's Notes are documents of the 60th Congress, 2d session.

EXPERIMENT STATION RECORD

It has been found necessary to increase the size of the Record in order to cover fully the literature of agricultural investigation. It is therefore proposed to issue from time to time, as the surplus of material accumulates, extra numbers, called "abstract numbers," which shall be made up almost exclusively of abstracts, that is, they will contain no editorial notes and only a limited number of current notes. Otherwise these numbers will be exactly like the other numbers and will be numbered and paged consecutively in the series. It is estimated that four such extra numbers (one every three months) during the year will meet present requirements. The first of these extra numbers, Volume XX, No. 8, of the regular series, is now in press. Another will probably be submitted shortly before the end of the fiscal year, thus closing Volume XX, with twelve numbers and indexes, with the fiscal year instead of in August of the succeeding fiscal year as in case of previous volumes. All of the details for subsequent volumes have not been definitely decided upon, but it is thought probable that two volumes a year, commencing with the first and seventh months of the fiscal year, July and January, will be found a convenient arrangement. Under this plan each volume would consist of six monthly and two abstract numbers.

UNITED STATES NAVAL MEDICAL BULLETIN

This new quarterly magazine issued by the Bureau of Medicine and Surgery, Navy Department, has become so popular that the demand for free copies is greater than can be supplied. Beginning with the number for April, 1909, the Superintendent of Documents will be prepared to sell the Bulletin, either by single numbers or annual subscription. The price can not be given in advance, owing to the differences in size of the numbers, but those who so request will be notified of the price immediately after the issue of each number. This is a correction of a note on the same subject that was published in the January, 1909, Monthly catalogue.

WASHINGTON WEATHER MAPS

Beginning with July 1, 1901, there are 2 prints of the Washington map, except on Sundays and holidays, when only 1 print appears, these Sunday and holiday maps including the additional information which on week days appears only on the later issue. In so far as the matter found on the map itself is concerned the 2 prints are identical; but the 1st print contains only the forecasts prepared at Washington and applicable to the Washington forecast district,

whereas the 2d print contains the forecasts for the entire United States, which is divided into 8 forecast districts, the centers of which are: Boston, Chicago, Denver, Louisville, New Orleans, Portland (Oreg.), San Francisco, and Washington. It will be noted, therefore, that for every day in the week, including Sundays, forecasts for various districts in the United States appear on the Washington map, the Sunday map, however, containing forecasts for a limited number of districts. For the days when 2 prints appear the forecast information on the 1st print is limited to the Middle Eastern and Southeastern States.

Although 2d prints of the Washington map have been appearing since July 1, 1901, the Public Documents Library has none of the 2d prints prior to February 1, 1909.

NOTABLE REPORTS AND ADDRESSES

A list, continued from the January, 1909, Monthly catalogue, of a few of the notable reports and addresses that have been made to Congress, showing where they may be found in the "sheep set":

Jefferson, Thomas.
Report on cod and whale fisheries. 1791. 42d Cong. 2d sess., H. mis. doc. 32.

Maury, Matthew Fontaine.
Wind and current charts. 1849. 30th Cong. 2d sess., H. rp. 112.

Maynard, Washburn.
Report on seal fisheries of Alaska. 1874. 44th Cong. 1st sess., H. ex. doc. 43.

Mayo, Robert.
Resolution to buy 1000 copies of Mayo's History of the Treasury Dept. 1849. 30th Cong. 2d sess., S. rp. 285.

Meade, Richard Worsam.
Message from President Monroe transmitting information as to the imprisonment in Spain of Meade, an American citizen. 1818. 15th Cong. 1st sess., H. doc. 67.

Medill, William.
Answer to charge of nullifying will of Congress and request for investigation of conduct as Comptroller of Treasury. 1860. 36th Cong. 1st sess., S. ex. doc. 51.

Meeker, Nathan C.
Massacre of Meeker and abduction of wife and daughter, at White River Indian agency. 1879. 46th Cong. 2d sess., H. ex. doc. 83. Also, 46th Cong. 2d sess., H. mis. doc. 38.

Meigs, Montgomery Cunningham.
Orders and instructions under which he traveled abroad. 1876. 44th Cong. 1st sess., H. ex. doc. 110.

Melville, George Wallace.
Promotion of Melville for meritorious services. 1889. 50th Cong. 2d sess., H. rp. 4026.

Mendenhall, Thomas Corwin.
Report on weights and measures. 1890. 51st Cong. 1st sess., S. ex. doc. 57.

Menocal, Anecito Garcia.
Report of Nicaragua Canal surveying party. 1885. 49th Cong. 1st sess., S. ex. doc. 99.

Monroe, James (5th President).
Annual message containing the "Monroe doctrine." 1823. 18th Cong. 1st sess., S. doc. 1.

Moore, John Bassett.
Report on extradition, prepared for International American Conference. 1890. 51st Cong. 1st sess., S. ex. doc. 55.

Morton, Oliver Perry.
Views on character, extent, and effect of Chinese immigration. 1878. 45th Cong. 2d sess., S. mis. doc. 20. [Posthumously published.]

Neill, Edward Duffield.
Memorial praying the publication of the Records of the Virginia Company of London from ms. in Library of Congress. 1868. 40th Cong. 2d sess., S. mis. doc. 84.

NOTE.—Mr. Neill, who was a well-known author and scholar of his day, had familiarized himself with the obsolete chirography and interesting contents of the Records, and proposed, without compensation for himself, to undertake their publication if Congress would allow him two copyists at $80 a month each for a year and a small sum for stationery and contingent expenses, but Congress did not listen to his appeal, though it printed as a Senate document ten pages of extracts and notes from the Records which Mr. Neill had submitted with his memorial. Not till 1906, under a different administration of the Library, were the Records of the Virginia Company finally printed.

Nelson, Edward William.
Birds of Bering Sea and Arctic Ocean. 1883. 47th Cong. 2d sess., H. ex. doc. 105.

Nettleton, Edward S.
Final report on irrigation, etc. 1892. 52d Cong. 1st sess., S. ex. doc. 41.

New, John Chalfant, and other U. S. consuls.
Statements relative to steamship subsidies in foreign countries. 1890. 51st Cong. 1st sess., H. mis. doc. 234.

Newberry, John Strong.
Paleozoic fishes of North America. 1890. 51st Cong. 1st sess., H. mis. doc. 249.

Newcomb, Simon.
Observations of transit of Venus, Dec. 1874, pt. 1. 1880. 46th Cong. 1st sess., S. ex. doc. 31.
Report on improvement of astronomical instruments. 1884. 48th Cong. 1st sess., S. ex. doc. 96.

Nicollet, Jean Nicholas.
Survey of hydrographical basin of upper Mississippi River. 1840. 26th Cong. 2d sess., S. doc. 237.

Nimmo, Joseph, jr.
Foreign commerce of United States and decadence of American shipping. 1869. 46th Cong. 2d sess., H. ex. doc. 86.

Nourse, Joseph Everett.
Maritime Canal of Suez from its inauguration, Nov. 17, 1869, to 1884. 48th Cong. 1st sess., S. ex. doc. 198.

This list will be continued.

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least $5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see page 504.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1: 62,500, 1: 125,000, and 1: 250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least $3.00.

PATENT OFFICE

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at $5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to $10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at $1.00 per package, or in books containing 100 coupons at $5.00 per book. One coupon will procure a specification with drawings. These coupons are good until used. Address Chief Clerk, Patent Office.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are: 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The *volumes* of Contributions and of Miscellaneous collections are distributed only to public libraries and to learned institutions and societies in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remains to supply demands from other sources. No general mailing-list of individuals is maintained. The reports can be had by purchase from the Superintendent of Documents, Washington, D. C. The papers printed in the annual reports are published separately for *free* distribution. Publications should be ordered by the *serial number*. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.
